What's the real benefit to you?

It's simple. Staying healthy is the ultimate benefit. We believe primary & preventive care is the foundation to good health, and we support that belief with the choices, benefits, and care our members deserve.

No Co-pay to pay | No Co-insurance to pay | No Deductibles to Meet

Simple – Easy - Affordable—Comprehensive

Health Care With You in Mind!

What the American Medical Association is saying:
 July 20, 2020

When physicians' offices were closed because of the COVID-19 pandemic and patients were under emergency stay-at-home orders, telehealth offered a way to maintain continuity of care.

In that respect, telehealth was just what the doctor ordered, and adoption of the technology skyrocketed because it filled a need by allowing health care services to be delivered while maintaining physical distancing. But this acceleration was also facilitated by the federal government, individual states and private insurance companies listening to physicians and removing regulatory barriers that previously limited telehealth uses and payment of services.

Here's Just a Few Great Reasons to Choose MOXIE Telemed:

The Power of Proactive Primary & Preventive Care:

Quality primary care is the backbone of any functional health care system. Everyone needs it, and when people have access, they stay healthier. Research shows far fewer ER visits, specialist visits, hospitalizations and surgeries are required when primary care needs are fully met. What's better, primary care & preventive medicine are inherently inexpensive.

MOXIE Telemed; we're here to help!

Quality Coverage!

Our affordable Telemedicine/Telehealth Plans provide quality care whether you're single, family or an employer, our plans can fit your budget. Plans are comprehensive, and you won't have to meet a deductible first. We cover member's ages 18-64 and eligible dependents to age 26.

Great Rates!

Once you become a Member, you'll enjoy the benefits of lower cost high value private Telemedicine benefits that are more robust than those in the marketplace. Members and Clients also have access to an additional suite of prestigious corporate benefits. Plan requires one flat monthly Fee which covers up to 6 qualified family members. There is a one-time \$99 enrollment Fee.

Simplified underwriting and easy enrollment process!

Coverage is guarantee issue and covers pre-existing medical conditions.

Pharmacy Services!

Plan members will receive discount pharmacy benefits which allows you to shop locally for your immediate need medications. Members also have access to our online mail order prescription drug program for even greater savings. Cost and certain drug availability is subject to change based on individual pharmacy policy.

Our online blood and laboratory tests with confidential results!

Put your health and wellness in your hands. MOXIE Telemed provides direct access laboratory testing for those who want to take charge of their own health and personally monitor their own wellness. We assist in the prevention or early detection of disease by providing high quality online blood and laboratory testing services directly and confidentially to consumers.

About your medical record!

Telemedicine and Telehealth Care does not replace a member's primary physician. Therefore, each time a member uses the service, all aspects of the visit are carefully notated and then sent to the patient's primary care physician by way of electronic health records or email at the patient's request.

Applying is Easy

Telemedicine the way it should be!

Enrollment is easy, with a simple application process and fast approval. All applicants requesting coverage must reside within the United States.

or visit us online at www.MoxieTelemed.com

In 2018, MOXIE Telemed partnered with MDLIVE because of their experience, know-how, safety, and secure telemedicine platform. MDLIVE's telemedicine services are designed to replace ER or urgent care visits with licensed physicians in all 50 states for non-emergency issues, including sore throats, asthma, skin rash, fever and more.

In addition to providing urgent care for over 50 routine medical conditions, MDLIVE also offers behavioral health therapy, in which licensed therapists consult with patients on issues such as marital problems, child behavior & learning issues, financial hardship and coping with loss and grief. MDLIVE also offers dermatology care for over 3,000 conditions of the skin, hair, and nails in which licensed dermatologists provide asynchronous diagnoses and treatment plans for conditions such as acne, eczema, rosacea, and psoriasis. MDLIVE dermatologists can also perform "spot checks" from uploaded images to determine whether a patient may need to see a dermatologist in person to be examined and treated for skin cancer.

All MDLIVE medical consultations are conducted through a [HIPAA](#) and PHI-compliant platform. In addition to allowing patients to talk to a doctor from home or on the go, and if necessary, obtain an e-prescription, payers and providers can use MDLIVE to collect and share clinical data from patient medical records, lab results and in-home biometric devices for real-time risk assessments, wellness advice, diagnoses and treatment.

This plan does not meet the requirements of the Affordable Care Act.
